

ARTIFICIAL INTELLIGENCE (AI) AND YOUR CHILD'S LEARNING

A QUICK GUIDE FOR PARENTS AND
GUARDIANS IN HRCE

WHAT IS AI?

Artificial Intelligence (AI) means computers that can learn from information and find patterns to help make decisions. AI doesn't think or feel like people—it uses data to make connections that led to informed responses.

HOW IS AI USED IN SCHOOLS?

- Teachers choose if and how AI is used in the classroom.
- Some lessons may include AI tools for learning or creativity.
- Students learn how to use technology safely and responsibly.

HOW AI CAN HELP LEARNING?

AI can:

- Give students quick feedback.
- Help with idea generation when a child is stuck.
- Adjust lessons to fit different learning needs.
- Change reading levels of text so it is more easily accessible.

Remember, teachers will always tell students when they can or cannot use AI for school work.

AI PRIVACY AND SAFETY TIPS:

- Never share personal info with AI tools.
- Only use apps approved by your school or regional centre.
- Look closely at the age restrictions of AI tools.
- Talk with your child about what's real, what's private, and what's fair online.

AT HOME YOU CAN HELP BY:

- Setting screen time limits and tech-free times.
- Talking about what your child does online.
- Reminding your child to check if AI answers make sense.
- Asking teachers about the AI usage guidelines.
- Reviewing classroom/school academic integrity guidelines.
